Current Planning	Development Review Valuations. Development Review fees are based on the total cost of all on-site improvements including buildings, landscaping (and irrigation), paving (includes hard surfaced storm drainage and private streets), and required open space; not included are land costs, administrative and professional fees, and other governmental fees. Development review fee applies to commercial, industrial, institutional, and capital improvement projects, but not residential projects.		
Current Planning	Fee Waivers. The Department of Land Use and Transportation may waive fees otherwise required under Current Planning (Development Services), with the exception of applications that will result in land divisions. Any individual who believes that he/she cannot pay the fees required may make application for a waiver. A waiver may be allowed only when the individual applying for a fee waiver is both an applicant and owner of the property that is the subject of the application fee. The individual must also be a non-corporate entity. The request must be submitted in writing with supporting documentation, including a certification from the U.S. Department of Housing and Urban Development demonstrating family income that is at or below the low income figure adjusted for household size. Meeting the family income requirement alone does not entitle an individual to a fee waiver. The Director may require additional evidence and consider other factors that are relevant to assessing an individual's ability to pay including but not limited to the value of assets owned by the applicant, the value of the property that is the subject of the application fee, and the potential for additional income from the development of that property. The Director shall waive a fee under this section upon a determination that the applicant is unable to pay the fee, based on meeting the low income standard, and considering assets and income potential if applicable
