* Prior to FY 08-09, the Average Tax Rate was computed by taking Total Taxes divided by Total Assessed Value minus Urban Renewal Excess, which can be found on Line 17 of the Washington County 4a. Beginning with FY 08-09, the Average Tax Rate was computed by taking Total Taxes divided by the Total Assessed Value on the Washington County 4a (Line 13 + Line 14). In FY 13-14, the Total Assessed Value on the 4a (Line 13 + Line 14) for the Taxing District of Washington County was slightly less than the total value within the County due to certain tax exemptions granted. The larger county value is now used to compute the Average Tax Rate.

**Compression** - Reduction in taxes required by the Measure 5 property tax rate limits approved in 1990. County assessors calculate compression as a dollar amount, but it can also be expressed as a tax rate. Compression is done on a property-by-property basis.

**Measure 5** - Constitutional tax rate limitations passed by voters in November, 1990, which can be found at Article XI, Section 11b, of the Oregon Constitution. Measure 5 limited school taxes to $15 per $1,000 of assessed value and non-school taxes to $10 per $1,000 of assessed value starting in 1991-92. The school limit fell by $2.50 per $1,000 each year until it reached $5 per $1,000 in 1995-96. The non-school limit remains at $10 per $1,000. Levies to pay bond principal and interest for capital construction projects are outside the limitation. The Measure 5 rate limits still apply under the provisions of Measure 50, passed in 1997, but now apply to M5 value.

## Glossary of Terminology

### General On-Going Maintenance and Repair

The Maximum Assessed Value (MAV) of a property cannot be increased due to general on-going maintenance and repair defined as the repair or replacement of existing property due to normal wear/tear/deterioration. Examples of on-going maintenance and repair may include re-roofing, painting, replacement of floor or wall covering.

### Maximum Assessed Value (MAV)

Maximum Assessed Value (MAV) is generally equal to the prior year Taxable Assessed Value times 103% or the prior year MAV, whichever is greater. MAV was initially established for 1997-98 as equal to 90% of the property’s Real Market Value in 1995-96.

### Maximum Specially Assessed Value (MSAV)

Maximum Specially Assessed Value (MSAV) applies only to the specially assessed portion of specially assessed property. For 1997-98, it was equal to 90% of the 1995-96 Specially Assessed Value. For subsequent years it was equal to its prior year Maximum Specially Assessed Value times 103%. Beginning with 2002 for farmland and 2004 for forestland, the MSAV is calculated as the prior year assessed value of the specially assessed portion times 103% or the prior year MSAV, whichever is greater.

### Measure 5 (M5)

Oregon Ballot Measure 5, passed in 1990, established constitutional limits on property taxes. After a period of implementation, total property taxes levied on any property were limited to a maximum of $5 per thousand of Real Market Value for all education levies, and $10 per thousand of Real Market Value for general government. Property taxes beyond these limits are not levied and are said to be "lost to compression."

### Measure 5 Value (M5 Value)

Measure 5 value is the value used to calculate the Measure 5 limits. This value differs from Real Market Value for property that is assessed under a Special Assessment program (such as Farm and Forest property, and SIP). For non-specially assessed property, Measure 5 Value is equal to Real Market Value (RMV). For specially assessed property, Measure 5 Value is the sum of the Real Market Value of the market portion of the account plus the Specially Assessed Value (SAV) of the specially assessed portion of the account.
Glossary of Terminology

**Measure 50**

The voters of Oregon passed an initiative Petition in November 1996 called Ballot Measure 47. This change to the Oregon Constitution provided for a “cut and cap” of property tax assessed values in the State. The cut was a roll back of the value of each property to its 1995 assessed value minus ten percent. The value cap restricted annual increases in assessed value to three percent unless certain changes to the property were made, such as new construction.

The 1997 Legislature found parts of Measure 47 to be unworkable and offered a substitute. Measure 50 provided for the same outcomes as well as additional provisions to enable a smoother implementation. The voters approved Measure 50 as a substitute for Measure 47 in May 1997. The changes in the property tax system were implemented in the 1997/98 tax year. These changes are found under Article XI, Section 11 in the Oregon Constitution.

**Minor Construction**

Improvements to real property, the Real Market Value (RMV) of which does not exceed $10,000 in any assessment year or $25,000 for cumulative additions made over five assessment years. The assessor may increase the Real Market Value (RMV) of the property to reflect minor construction; however the Maximum Assessed Value (MAV) may not be increased to reflect minor construction.

**Net Assessed Value**

(Same as "Value to Compute the Rates" on form 4a line 17) Net Assessed Value is used to calculate district tax rates for dollar levies. It is total assessed value plus nonprofit housing value and state fish and wildlife value minus urban renewal excess value used.

**Real Market Value (RMV)**

Real Market Value is the value a property would sell for in a competitive market if the property were used in its highest and best use. RMV is the amount in cash that could reasonably be expected to be paid by an informed buyer to an informed seller, each acting without compulsion in an arm's length transaction occurring as of the assessment date for the tax year.

For purposes of this Summary Book, RMV is reported only for assessable (taxable) property. Exempt RMV is not included. For most properties, the M5 value equals the RMV.
