	Emergency	Transitional		
Total number of households	0		0	**0**
Total number of persons	0		0	**0**

Methodology for OR-506 - Hillsboro, Beaverton/Washington County CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	**100%**
Provider-level surveys	**0%**
Client-level surveys	**0%**
Observation	**0%**
Other	**0%**
Total	**100%**

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

- Comparison of unique client identifiers (not PII)

- Blitz count of persons in shelters (i.e., count occurred at same time to avoid double counting)

Sheltered Subpopulation

4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)

- HMIS Data

- Provider-level surveys

5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?

- All sheltered people

6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.

- Change in emergency shelter capacity

- Change in transitional housing capacity

Please provide a brief description of these specific factors (500 word limit):

CHANGE IN EMERGENCY SHELTER CAPACITY: Winter shelter decrease of 25-beds and 12-beds out of service in year-round Family Promise of Washington County program. An increase of 14-beds with new year-round Family Promise of Tualatin Valley shelter serving families.

CHANGE IN TRANSITIONAL HOUSING CAPACITY: Veteran Grant Per Diem program added 7-beds serving homeless veterans.

Unsheltered Population

7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)

- "Night of the count" - complete census

- HMIS

7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?

No

7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?

- All people encountered during the count

8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

- Comparison of unique client identifiers (not PII)

- Blitz count of unsheltered people (i.e., canvassing of different areas occurred at same time to avoid double counting)

- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Unsheltered Subpopulations

9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?

- Surveys/interviews of people identified as unsheltered on the night of the PIT count

- Surveys/interviews of people identified within 7 days following the night of the PIT count night who may have been unsheltered on the night of the PIT count (e.g., "service-based" surveys at locations where people who are homeless go for assistance)

10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?

- All people encountered were surveyed

11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

- Comparison of unique client identifiers (not PII)

- Blitz count of unsheltered people (i.e., sheltered and unsheltered counts occurred at same time to avoid double counting)

- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below

- Increased or improved PIT count training

- Change in CoC geographic coverage area

- Other:

Please provide a brief description of these specific factors (500 word limit):

- HMIS data from street outreach and/or other providers

Use of ArcGIS digital APP to collect response to PIT interview questions and map locations

INCREASED OR IMPROVED PIT COUNT TRAINING: The PIT training for 122 enumerators (e.g. social workers, community leaders, formerly homeless/homeless) included the use of an APP (ArcGIS - Survey123) to map locations and collect the PIT interview data that is used for reporting and analysis. The APP automated the collection of data for the annual homeless census using cell phone devices with training provided on the APP use and privacy/security of all data collected. The data was imported into HMIS and used to extrapolate the 2020 Point-In-Time Census data.

CHANGE IN COC GEOGRAPHIC COVERAGE AREA: In October 2019, the CoC began implementing a national initiative to know all homeless persons in our community "by-name" under the Built For Zero model. To fully implement this model, the CoC convened an Outreach Committee focused on coordinating geographic coverage across the jurisdiction. The implementation includes provider agencies, law enforcement, day center staff, and community volunteers to identify and share information on homeless encampments and work collectively to engage and case conference the individuals living at these sites. This effort has resulted in greater knowledge of who is homeless and least likely to engage in coordinated entry or homeless services. The CoC is working off the by-name list created in HMIS to regularly make contact with these individuals.
