**Ground rules
reminder**

Decision-making (from protocols)

- This PAC will provide **advice** to the Washington County Board of Commissioners.
- The committee will provide advice by **consensus**.
 - Consensus is defined as the point where committee members agree on the best option for the group even if it is not each committee member's personal favorite.
- If consensus cannot be reached, **2/3 of members** must reach consensus for a recommendation to be considered a recommendation.
 - If that threshold cannot be reached, the Project Management Team will consider all comments and make an informed decision in order to keep the project moving forward. The group does not require a quorum to develop a group recommendation.
- **All opinions** will be part of the meeting record.
- All **decisions will be “frozen”** unless the committee reaches consensus that a decision needs to be revisited.
