

# SW TAYLORS FERRY ROAD BRIDGE & SIDEWALK PROJECT

## PROJECT BACKGROUND

This project consists of two parts:

- Bridge replacement at SW Taylors Ferry Road / SW 80<sup>th</sup> Avenue over Ash Creek. The bridge is in poor condition due to past auto accidents and flooding. Existing bridge will be replaced with either a box culvert or cast-in-place bridge.
- Sidewalk construction between SW Washington Drive and SW 78<sup>th</sup> Place. Intent is to complete the sidewalk connections between the above streets on the north side of Taylors Ferry Road.
